Service	Description	Available from
Solar home heating and cooling systems	AS SEEN ON ABC NEW INVENTORS The roof of your house is a huge solar collector. Solectair is a heat transfer system that hides away in the ceiling space of your house, where it puts free heat energy or cool night air to use. Kits can be fitted stand-alone or in conjunction with ducted systems.	Solectair Pty Ltd M: 0405 406 269 W: www.solectair.com E: sales@solectair.com
Tin and tile roof cooling	If your room temperature needs cooling from the cooler outside air, Smartbreeze will blow the fresh cool air into your home creating a relaxing night breeze to achieve the room temperature set.	Smartroof Pty Ltd W: www.smartroof.com.au/ T: 9510 3484
Solar air cooling	On hot summer nights, cool fresh air is drawn through the SolaMate panel and into your home. SolaMate quickly replaces the hot indoor air with fresh cool ambient air without the need to open windows, and continuously delivers this cool fresh air into your house throughout the night.	SolaMate W: www.sola-mate.com/ T: 9208 4131
Solar attic fan, gable fan and sub-floor vent	Placed wherever you need to improve air circulation. Ventilation is an important part of maintaining energy efficiency in a property. Proper venting cools your roof thus extending the material life and reduces the work load on your air conditioning system.	Solar Breeze PO Box 8792, Armadale 3143 T: 1300 194 500 E: info@solarbreeze.com.au W: www.solarbreeze.com.au
Solar space heating, ventilation & cooling	Heating, cooling and ventilating, a healthy indoor climate without any operating costs. When the outdoor temperature becomes too high, you can add an extra fan to the shady side of the house and connected to a thermostat inside the building. No maintenance or operating costs as the extra fan is operated by the solar cell.	Solar Venti Global Eco & Environmental Solutions 205 Elgar Rd, Surrey Hills 3127 T: 9808 1555 E: ges@ges.com.au W: www.ges.com.au
Solar Star Roof Mount Fan	Solar-powered roof fan that keeps you cool. Circulates air and ventilates your roof space, transforming your home into a comfortable living environment. Powered by Solar Star's proprietary 10-watt solar panel, fights heat and moisture and costs nothing to operate.	Made by Solatube Australia Available from: Bendigo Cedar Sales Factory 2, 78 Hattam St, Golden Square T: 5443 0681 www.solatube.com.au
Ducted heating integrated air conditioning system	Overhead gas ducted heating installed either in the floor or ceiling comprises a central heating unit, which is connected to a series of outlets positioned strategically throughout your home. This system able to integrate an air conditioning system providing you with year round comfort.	Central-Air Refrigeration 16-18 Johnstone St, Castlemaine T: 5479 4000 E: admin@centralair.net.au W: www.cenralair.net.au
Evaporative	Ducted evaporative cooling comprises a central	Central-Air Refrigeration

cooling	cooling unit connected to a series of outlets throughout your house. The cooling unit draws fresh air through the moistened pads. The air is cooled and filtered before flowing through the duct work and into your rooms.	16-18 Johnstone St, Castlemaine T: 5479 4000 E: admin@centralair.net.au W: www.cenralair.net.au
Ceiling fans	Ceiling fans do not use much energy, approximately as much as a single 100 watt light bulb, and using a ceiling fan effectively can benefit a household throughout all the seasons of the year. In the summer months, your ceiling fan offers the greatest energy saving benefits when run in a counter-clockwise direction. Effective circulation can make you feel up to eight degrees cooler, and reduce air conditioning bills by up to 40%.
